

PAUL PARTHIBAN J

Senior Software Engineer | AI-Native Development | Full-Stack | Backend Development

Tirunelveli, India | 6374178098 | paulparthiban.j@gmail.com | github.com/paulparthiban-j | linkedin.com/in/paul-parthiban-j

Summary

Senior Software Engineer with 2+ years building scalable REST APIs, enterprise systems, and full-stack applications using Node.js, .NET, and React. AI-native developer — uses Claude for code generation, debugging, refactoring, and test creation to accelerate development. Designed role-based access systems, automated business workflows (40% efficiency improvement), and handled high-volume transactions (1K+ daily). Experienced in real-time systems, cloud deployment (AWS EC2), and production troubleshooting.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, C#, Python, PHP

Frontend & Mobile: React.js, React Native, Flutter, Tailwind CSS, Zustand, React Query

Backend: Node.js, Express.js, .NET Web API, Spring Boot, REST API Design

Security: JWT Authentication, RBAC, OAuth/SSO

Databases & Data Access: MySQL, SQL Server, Sequelize, Entity Framework Core, Dapper

Cloud & DevOps: AWS EC2, Windows Server, IIS, Vercel, Linux (Ubuntu), Git, Sentry

Testing & Automation: API Testing, Automated Testing, Workflow Automation

AI-Native Development: Claude, AI-Assisted Code Generation, Debugging, Refactoring, Test Generation

Tools: Swagger, VS Code

Experience

PainPoint Tech Solutions

Coimbatore, Tamil Nadu

painpoint.in

Senior Software Developer

May 2026 – Present

- Own and maintain four production .NET systems for the company's clients, spanning distribution, education management, HR case management, and trading operations.
- Led a security review on a distribution ERP, closing a frontend/backend permission gap found via live verification.
- Designed a requirements-driven permission model for an HR platform, tracing every permission back to its source requirement.
- Own the full deployment lifecycle: automated testing, live verification, and production release.

Jeyachandran Industries Pvt. Ltd

Chennai, Tamil Nadu

Junior Software Developer

Mar 2025 – May 2026

- Designed and developed RESTful APIs using **Node.js** and **Express.js** supporting enterprise business workflows and data processing.
- Implemented backend services handling procurement and supply chain logic with **Sequelize ORM** and **MySQL**, optimizing database operations.
- Integrated **SAP APIs** enabling real-time data synchronization across internal and external systems.
- Deployed and maintained production applications on **AWS EC2 (Linux)**, handling server configuration, monitoring, and issue resolution.
- Diagnosed and resolved production issues, ensuring system reliability and minimal downtime for business-critical applications.

Ramachandran Retail Pvt. Ltd

Thiruvananthapuram, Kerala

IT Support Engineer

Jun 2024 – Jan 2025

- Provided production support for **Microsoft Dynamics AX**, ensuring high availability of business-critical systems.
- Managed Linux and Windows servers, performing system monitoring, debugging, and issue resolution.

Projects

AdminCore — Enterprise Access Management Platform

React, TypeScript, .NET Web API, SQL Server, SignalR

- Designed and built a full-stack RBAC platform supporting secure role-based access control across multiple modules with JWT authentication.
- Implemented fine-grained permission system enabling dynamic role assignment and access control with audit logging and session security.
- Engineered SignalR integration for real-time updates, eliminating polling-based inefficiencies and improving system responsiveness.
- Developed analytics dashboards and data visualization features for administrative insights.
- Deployed full-stack React and .NET applications on Windows Server using IIS, configuring application pools, site bindings, and production hosting.

P2P — Supply Chain Management System

Node.js, Express, Sequelize, MySQL

- Architected end-to-end supply chain system supporting procurement, logistics, and warehouse operations for 100+ users with scalable backend handling 1K+ daily transactions.
- Automated purchase workflows (SIR/SOR, GRN, invoicing), reducing manual processing time by 40% through workflow optimization.
- Developed real-time inventory tracking and supplier management improving data accuracy by 25% with optimized database operations.
- Built comprehensive API architecture supporting business operations.

Purchase Request Management System

PHP, MySQL, JavaScript

- Developed role-based workflow system with access control and automated validation processes for enterprise procurement.
- Implemented REST APIs for category management, validation, and authentication.
- Integrated cross-database queries for SAP synchronization and vendor management.

Gesture-Controlled Video Player

Python, OpenCV, MediaPipe

- Developed a computer vision-based media control system using real-time gesture recognition with MediaPipe.

FamilyVerse Platform

React Native, Expo, React, TypeScript, Vite, Firebase, Socket.io, Vercel

- Built cross-platform family communication platform with React Native mobile app and React web application using TypeScript.
- Integrated Firebase services for authentication, real-time database, notifications, and cloud storage across mobile and web.
- Implemented real-time communication using Socket.io and WebRTC for video/audio calling features in mobile app.
- Deployed web application to Vercel with optimized build configuration and performance monitoring.
- Added payment integration with Razorpay and document/file management capabilities in mobile app.

DISTRIBIZ ERP Mobile Client

Flutter, Dart, Riverpod, Drift, Go Router

- Developed multi-platform Flutter ERP client for Android, iOS, Windows, macOS, and POS systems using Dart and Riverpod state management.
- Implemented offline-first architecture with Drift (SQLite) for local data persistence and sync with backend APIs.
- Built secure authentication and session management using flutter_secure_storage and dio with cookie management.
- Integrated thermal printer support for POS operations with flutter_thermal_printer and esc_pos_utils_plus.

Personal Portfolio Website

Next.js, React, TypeScript, Tailwind CSS, Vercel

- Built personal portfolio website using Next.js 16 with React 19 and TypeScript for professional presentation.
- Implemented modern animations using Framer Motion, GSAP, and Lenis for smooth scrolling effects.
- Deployed to Vercel with Speed Insights integration for performance monitoring and optimization.
- Configured responsive design with Tailwind CSS and DaisyUI for cross-device compatibility.

Education

Master of Science — St. John's College	2024
GPA: 7.9	
Bachelor of Science — Manonmaniam Sundaranar University College	2022
GPA: 7.5	

Certifications

- Full-Stack Development Internship — AK Infopark
- NPTEL — Python for Data Science and Programming in Java
